

Enhanced Compensation with OnusOne

IRG's compensation program centers around your efficiency at providing care and developing relationships so you can treat patients, not paper.

Benefits of enhanced compensation

- Increase your income
- Flex your time and schedule to suit your life
- Have ownership and autonomy of your case load
- Develop your career and carve your own path

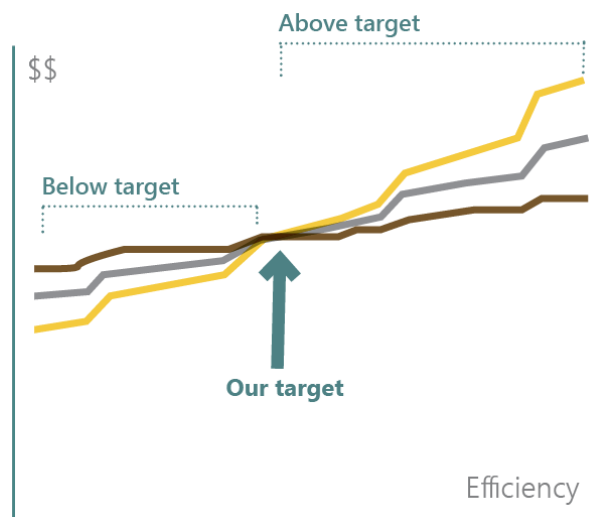

Enhanced compensation uses data to pay our providers accurately for the work they do. Using OnusOne as our platform provides many benefits which include greater income opportunity, time and schedule flexibility, and autonomy to build your unique path for vocational goals as well as work-life balance and career development.

Enhanced compensation takes into account three main pieces of data.

- IRG's unique metrics (units, con-ed, and more)
- Leadership's goals and objectives and your clinic's scheduling needs
- Your unique profile and choice of base pay and performance percentage mix

Once you are fully credentialed through IRG, we'll work with you individually to pick the best plan for your career and life goals. **We will go over these options in detail a few weeks into your IRG journey.**

- **Gold** – Highest potential earnings; higher rewards for efficient work
- **Bronze** – Steady and consistent paycheck
- **Silver** – A happy medium of both options
